S/2659/63/010/000/0204/0207

AUTHOR: Morozova, G. G.; Endzelin, M. A.

TITLE: The influence of grain size, grain heterogeneity and method of obtaining metals with various grain sizes on the heat resistance of nickel-chromium alloys

SOURCE: AN SSSR. Institut metallurgii. Issledovaniya po zharoprochnym splavam, v. 10, 1963, 204-207

TOPIC TAGS: grain size, grain heterogeneity, nickel-chromium alloy, heat resistance, alloy heat resistance, nickel alloy, chromium alloy

ABSTRACT: The authors consider the influence of the method of producing various grain sizes (high-temperature heating, cold deformation followed by heating, or hot deformation followed by heating), as well as the grain size itself, on the heat resistance of Ni-Cr alloys, grades 230, EI-893 and EI-765. They conclude that for both fine-grain and coarse-grain grade 230 and EI-893 alloys, the method of producing the grain influences their properties. The size of the grain, independent of the method, also influences the properties of these alloys. The short-term rupture strength is higher for fine-grain (by 10-20%) than for coarse-grain alloys. The tensile strength and relaxation strength for all temperatures and

Card 1/2

ACCESSION NR: AT4013952

stresses is somewhat higher for coarse-grain materials than for fine-grain alloys. Heterogeneity of grade EI-765 alloy does not significantly influence the tensile strength at 700 or 800C if the grain size is not over 1-3 mm. When the grain size is larger, the strength drops significantly. Orig. art. has: 2 figures.

ORG: Institute of Nuclear Research (Institut Yadernykh Issledovaniy)

TITLE: Measurement of velocity of plasma in the plasmotron nozzle and in the free stream of plasma

SOURCE: Nukleonika, v.10, no.4, 1965, 195-200

TOPIC TAGS: plasma velocity, plasma measurement, plasma dynamics

ABSTRACT: A method for the measurement of plasma velocity inside the plasmotron nozzle as well as for measurement of plasma velocity from the combustion chamber is described. The method is based on the optical observations of the ion cloud produced in the plasma by the electric discharge. The results of velocity measurements as a function of mass of flow of the stabilizing gas in the plasmotron and of flow of the fuel in the combustion chamber are given. The authors express their thanks to Prof. V. Bzhozovski for his constant interest in the work and for valuable discussions.

Title : Influence of Some Fungicides on Seeds of Vegetable Plants

Orig Pub : Anuarul lucrar. stiint. Inst. agron. Craiova, Bucuresti,
1957, 339-348

Abstract : Formation, CuSO₄ solutions, and mercuric chloride (in various concentrations) were used in the treatment of seeds of the pepper, cucumber, onion, tomato, and cabbage against phytopathogenic microorganisms transmitted by the seeds. High concentrations of mercuric chloride depressed germination of the treated seeds, and lower concentrations were not effective against the microorganisms; CuSO₄ had no effect on the germination of seeds of the cucumber and cabbage.

ORIG. PUB.	:	Anuarul lucar. stiint. Inst. agron. Iasi. Bucuresti 1957, 123-129
ABSTRACT	:	Observations on the development of principal grapevine varieties in the vineyards in Normar, Bushum-Vishin and Kopou under the unfavorable conditions of 1955 (excessive moisture and low temperature in the period of vegetation). Varieties which proved to be most resistant to the unfavorable conditions of growth in 1955, were: Aligote, Muscat Hamburg and Chasselas dore. For grapevine varieties non-resistant to unfavorable conditions (Grasa de Rothar', Frynkusha, Bebyaske nyagra and Fetyska Al'ba) it is recommended to apply a complex agricultural tech-

TITLE: An International Conference on Problems of Division
Into Economic Regions
PERIODICAL: Izvestiya Akademii nauk SSSR, Seriya geograficheskaya,
1959, Nr 5, pp 117-120 (USSR)
ABSTRACT: The above mentioned conference took place on 29 May -
1 June 1959 in Kasiemiers Dolny (Poland).
(USSR). In the second part the following Polish geo-
graphers reported on different economic problems of
division into economic regions: S. Makowska - on
workers' commuting in the Krakow wojewodztwo; W.
Dobrowolska - on the influence of industrialization
on the formation of regions and on the types of in-
habited centers; L. Straszynska - on the analysis of
the bases of principles of development of economic
regions as shown by the example of study of the
Lodz industrial district; A. Tróbel - on the joint
regions of passenger transportation in Poland; and
L. Kaczyński - on the study of the sphere of influence
of Polish small towns. Other reports were read by:
Professor Ia. Kortik (Czechoslovakia) - on "Imigra-
tion Basis of Czech Towns"; Kh. Marinyx (Bulgaria) on
"Methods of Study of Economic Connections and Inter-
regional Exchange"; M. Blašek (Czechoslovakia) - on
"Problems of Development of Weakly Developed Rayons
of the Piench Region"; G. Rendi (Hungary) on a "Method
of Delimitation of Agricultural Regions", and G.
Schmid-Kanner (F. Germany) on the "Problems of Re-
gional Economics". Reports were also read by G. Julipp
(Belgium) and L. Schneider (W. Germany). Finally the
last report on "The Economic Region in Economic Geo-
graphy and in Perspective Planning" was read by Pro-
fessor L. Osiński which he tried to establish
basic elements of planning and to generalize some of
the problems of division.
